

JAMANVAAR KIOSK

Complete Self-Ordering Kiosk Feature Breakdown

Customer-facing self-ordering terminal integrated with JAMANVAAR POS, Cloud API, KDS and Captain.

1. Welcome / Idle Screen

- Restaurant logo/name
- Welcome message
- Start Order
- Language selector
- Promotional banners
- Food images
- Offers
- QR/mobile handoff
- Help/accessibility
- Automatic return to welcome

2. Session Management

- Unique kiosk session
- Session ID
- Session lifecycle
- Clear previous customer data
- Timeout and cancellation handling

3. Order Types

- Dine-in
- Takeaway
- Delivery where enabled
- Restaurant-configurable order types

4. Dine-in

- Table selection/entry
- Table QR scan
- Kiosk zone
- Guest count
- Table-linked order

5. Takeaway

- Takeaway workflow
- Token number
- Pickup counter
- Collection status

6. Menu

- Categories
- Popular items

- Combos
- Search
- Featured items
- Availability indicators
- Fast category switching

7. Item Cards

- Image
- Name
- Price
- Description
- Veg/non-veg
- Popular/new badges
- Spicy/dietary indicators
- Availability

8. Search

- Item search
- Instant results
- Search suggestions
- Partial-text matching

9. Item Details

- Large image
- Description
- Ingredients where configured
- Portion
- Preparation time
- Dietary information
- Add to cart

10. Modifiers & Customization

- Required modifiers
- Optional modifiers
- Size
- Spice level
- Add-ons
- Substitutions
- Quantity
- Special instructions

11. Allergen / Dietary Information

- Configured allergen labels
- Dietary tags
- Clear disclosure
- No guarantee of allergen-free preparation

12. Cart

- Items
- Quantities
- Modifiers
- Notes
- Subtotal
- Discount
- Tax
- Service charge
- Tip
- Total
- Continue shopping

13. Cart Validation

- Recheck availability
- Recheck price
- Recheck modifiers
- Quantity limits
- Coupon rules
- Never silently alter an order

14. Recommendations & Upselling

- Related items
- Add-ons
- Drinks
- Desserts
- Size upgrades
- Combo suggestions
- Configurable non-intrusive upselling

15. Combo Builder

- Choose main
- Choose side
- Choose drink
- Optional upgrades
- Combo pricing

16. Customer Account

- Guest checkout
- Optional login
- Phone number
- Account creation without forcing signup

17. OTP Login

- Mobile number
- OTP verification

- Authenticated session
- Secure temporary OTP handling

18. Loyalty

- Points balance
- Earn points
- Redeem points
- Rewards
- Eligibility validation

19. Coupons / Offers

- Coupon entry
- Validation
- Discount display
- Expired/invalid handling
- Minimum-order rules
- Automatic offers
- Time-based offers
- Kiosk-specific promotions

20. Checkout

- Complete order summary
- Items
- Taxes
- Discounts
- Service charge
- Tip
- Final total

21. Payment

- UPI
- Card
- Contactless/NFC where supported
- Wallets where integrated
- Cash-at-counter
- Configured payment methods

22. UPI

- Payment QR
- Amount
- Pending state
- Success
- Failure
- Timeout

23. Card

- Connected terminal

- Tap/insert/swipe where supported
- Transaction status
- Success/failure

24. Payment Recovery

- Retry
- Change method
- Cancel
- Verify provider status
- Payment timeout
- Duplicate-payment protection
- Never create duplicate order

25. Order Creation

- Unique order number
- Cloud order ID
- Local/session ID
- Idempotency key
- Source=KIOSK
- Outlet/device metadata

26. Token & Receipt

- Token number
- Pickup counter
- Printed receipt
- Digital receipt
- QR receipt
- SMS/email/WhatsApp where integrated

27. Order Status

- Confirmed
- Payment received
- Kitchen accepted
- Preparing
- Ready
- Collected/served

28. Customer Pickup

- Token
- Counter
- Pickup instructions
- Collection status
- Customer display/token board integration

29. QR / Mobile Handoff

- Session QR
- Continue on phone where supported

- Link session/order context

30. Staff Assistance

- Call staff
- Kiosk ID in request
- Staff notification
- Request status

31. Accessibility

- Large text
- Large touch targets
- High contrast
- Screen-reader support where supported
- Reduced animation
- Audio guidance

32. Languages

- English
- Hindi
- Gujarati
- Other configured languages
- Localized menu names/descriptions

33. Branding / Theme

- Logo
- Colors
- Fonts
- Welcome screen
- Banners
- Light/dark theme
- Restaurant-controlled branding

34. Device Registration

- Unique kiosk ID
- Restaurant/outlet assignment
- Physical location
- Activate/deactivate
- Rename
- Revoke

35. Kiosk Health

- Application
- Internet
- API
- Database
- Realtime
- Payment terminal

- Printer
- Display
- Touchscreen
- Last heartbeat

36. Remote Management

- Remote restart where supported
- Remote lock
- Maintenance mode
- Unavailable screen

37. Software Updates

- Version check
- Automatic/scheduled update
- Security update
- Do not interrupt payment/order
- Rollback where supported

38. OS Kiosk Security

- Prevent desktop access
- Prevent browser access
- Prevent terminal/file access
- Restrict settings
- Restrict unauthorized USB/device access where supported

39. Privacy & Session Reset

- Inactivity countdown
- Clear cart
- Clear phone/OTP
- Clear temporary payment/session data
- Return to welcome
- No previous customer data visible

40. Crash Recovery

- Safe restart
- Recover technical state when appropriate
- Never duplicate payment/order
- Return to safe state

41. Offline Mode

- Cached menu
- Cached prices
- Local browsing
- Local cart
- Offline indicator
- Online payment requires connectivity unless explicitly supported

42. Local Database

- Menu
- Prices
- Modifiers
- Categories
- Images/cache
- Configuration
- Temporary sessions
- Offline queue
- Sync events

43. Sync Engine

- Upload pending events
- Download configuration
- Retry failures
- Track sync
- Idempotent operations

44. Price / Availability Validation

- Cloud price verification
- Price-change prompt
- Sold-out status
- Paused item
- Prevent unavailable orders
- Realtime availability updates

45. POS Integration

- Kiosk orders in POS
- Source/device recorded
- Payment/bill status
- Cancellation/refund status

46. Captain Integration

- Dine-in kiosk orders
- Table linkage
- Service workflow
- Customer requests

47. KDS Integration

- Kiosk order to KOT
- Station routing
- Preparation
- Ready status
- Modification/cancellation

48. Realtime Integration

- Kiosk→Cloud→POS/KDS
- KDS status→Cloud→Kiosk
- Live status without refresh

49. Analytics

- Kiosk orders
- Revenue
- Average order value
- Orders per kiosk
- Abandoned carts
- Session time
- Payment failures
- Timeouts

50. Customer Behavior Analytics

- Popular items
- Searches
- Category views
- Adds/removes
- Upsell conversion
- Coupon usage

51. Conversion Funnel

- Sessions
- Menu browsing
- Item added
- Cart
- Checkout
- Payment
- Completed order

52. Payment Analytics

- UPI/card/cash mix
- Success
- Failure
- Timeout
- Retry
- Cancellation

53. Wait-Time Estimation

- Estimated preparation time
- KDS workload-based estimate
- Dynamic updates
- Clearly label estimates

54. Customer Notifications

- On-screen

- Sound
- SMS
- WhatsApp
- Token board where integrated

55. Order History / Reorder

- Customer history when logged in
- Previous orders
- Order Again
- Revalidate price/availability

56. Favorites

- Favorite items
- Fast reorder
- Account based

57. Feedback / Issues

- Rating
- Food feedback
- Ordering experience
- Service feedback
- Wrong item
- Missing item
- Payment issue
- Other

58. Staff Mode / Overrides

- Authenticated staff mode
- Assist customer
- Allowed order edits
- Payment help
- Receipt reprint
- Cancel session
- Approved discounts
- Sensitive actions audited

59. Refunds / Cancellation

- Refund authority primarily POS/Admin
- Kiosk displays refund status
- Customer cancellation before submission
- Configured post-order cancellation window
- Staff approval where needed

60. Restricted Items

- Configurable legal age-verification workflow where applicable
- Staff escalation
- Do not rely only on checkbox

61. Multiple Kiosks

- Manage many kiosks
- Individual status
- Location
- Analytics
- Configuration

62. Hardware Monitoring

- Touchscreen
- Display
- Printer
- Card terminal
- QR scanner where used
- NFC
- Speakers
- Network
- Storage
- CPU/RAM

63. Hardware Test Mode

- Display test
- Touch test
- Printer test
- Card terminal test
- Speaker test
- Network test

64. Printer Management

- Receipt printer
- Token printer
- Backup printer
- Connection status
- Test print
- Failure recovery
- Digital receipt fallback

65. Payment Terminal Management

- Connected/disconnected
- Terminal ID
- Transaction status
- Last transaction
- Health

66. Network Monitoring

- Internet
- Latency

- Cloud
- Realtime
- Last sync

67. License / Entitlement

- Restaurant plan
- Kiosk entitlement
- Allowed device count
- Active count
- Trial
- Active
- Expired
- Suspended
- Revoked

68. Configuration Sync

- Menu
- Prices
- Taxes
- Promotions
- Languages
- Payments
- Printers
- Order types
- Tables
- Branding

69. Menu Versioning / Cache

- Cloud menu version
- Kiosk version
- Automatic update
- Image cache
- Cache invalidation

70. Performance UX

- Fast category switching
- Smooth scrolling
- Fast cart
- Cached data
- Optimized images
- Minimal API calls
- Minimal taps
- Minimal typing

71. Help

- How to order

- Payment help
- Call staff
- Cancel order
- Accessibility/help content

72. Final Confirmation

- Thank-you screen
- Order number
- Token
- Paid amount
- Estimated wait
- Pickup instructions
- Track order

73. Audit Log

- Session start/end
- Item changes
- Coupon
- Discount
- Payment attempts
- Payment result
- Order creation
- Cancellation
- Staff intervention
- Restart
- Maintenance

74. End-to-End Flow

- Welcome → Start → Order Type → Table/Takeaway → Menu → Item → Modifiers → Cart → Offers/Coupon → Customer Details → Checkout → Payment → Confirmation → Token → KDS → Preparing → Ready → Pickup → Session Reset

JAMANVAAR KIOSK — CORE ARCHITECTURE

- Kiosk → Cloud API → POS / KDS / Captain
- Kiosk orders use the same central order lifecycle as POS and Captain.
- Restaurant Admin controls menu, prices, taxes, promotions, payment methods, branding, devices and permissions.
- Kiosk should remain customer-facing and must not expose operational/admin controls.

KEY DIFFERENTIATORS

- Cached/offline menu browsing.
- Fast touchscreen-first ordering.
- Automatic session reset and customer-data clearing.
- Payment crash recovery and duplicate-payment protection.
- Idempotent order creation.
- Live KDS-based wait estimates.
- Real-time order tracking.
- Multi-kiosk remote management and health monitoring.

- Staff assistance mode.
- English/Hindi/Gujarati-ready multilingual experience.
- QR/mobile handoff.
- Smart upselling and combo builder.
- Complete kiosk conversion funnel and analytics.
- JAMANVAAR license/entitlement control.
